

Ohio Mentor Inc.

Behavioral Health Respite Expansion in Northwest Ohio

“We hear from families how much this service has changed their stress management levels just by having the break that this respite service allows. We hear from these families that resources are extremely hard, if not impossible, for them to access in their community. Being that resource for them has been an amazing three months for our agency and we look forward to continuing to build that capacity with the foundation that the OhioRise grant has given us.”
